“The [Carmanah] lights are working great. We are saving a lot of money in batteries, maintenance and overhead. We used to go through 90 batteries in a couple of weeks, costing hundreds of dollars. The Carmanah 601 barricade light has worked for nearly two years, maintenance-free and with no problems. A great product and safety enhancement for Chicago O'Hare...”

Electrician Foreman for Runways

“The aircraft parks and heavy equipment rushes up to the ramp to begin the offload. One of the tractors runs over a taxiway light. No problem. Carmanah builds quality equipment. As you can see by the picture, despite being run over, and [dragged] over a taxiway and desert sand for more than fifteen feet, the light still shines, [providing] a secure path for the aircraft and equipment to operate on.”

Airfield Operations, US Marine Corps
Middle East Location

“Carmanah airfield lights saved lives in Iraq during OIF2 at Balad Airbase. Your sturdy ‘maintenance-free’ self-contained lights were deployed in one day, lighting our parking pads, refueling areas, taxi-ways and four landing pads for our 140 plus helicopters. They instantly made our operations safer... Great product... Thanks.”
